

## JOB DESCRIPTION – PRINCIPAL CONSULTANT IN WATER RESOURCES/SUSTAINABILITY

**Job Title:** Principal Consultant

**Location:** Bath

**Department:** Water and Environment

**Salary:** Competitive, dependent on experience

**Reporting to:** Water & Environment Director

Zenith Global provides a full range of specialist consulting services to the food and drink industries worldwide. We have over 1,000 clients across more than 50 countries with head office in Bath. Our Water & Environment group comprises a team of hydrogeologists and water resource experts who provide specialist knowledge for water resource projects across the globe. For more information please visit our website [www.zenithglobal.com](http://www.zenithglobal.com)

We are looking for an enthusiastic principal consultant with experience in water resource and/or sustainability projects in a commercial environment to join the Water & Environment consulting team on a full-time basis. The successful candidate would need to be flexible in their working approach, show an aptitude for business development, have a willingness to travel and be keen to learn about the bottled water and beverage industries worldwide. This is an exciting opportunity for an individual to implement a range of consultancy skills and to gain an insight into this highly technical field through working with a global leader in the sector.

## JOB SUMMARY

- Key business development role within the team, developing work from new and existing clients
- Managing project team and mentoring junior staff
- Project and financial management and accountability on a range of existing projects
- Provide expert technical role within projects, including fieldwork and office work
- Reporting to senior management on project progress and accounting
- Direct client liaison, attending technical meetings and contractor supervision and negotiation

## DEPARTMENT DIMENSIONS

The department consists of a team of hydrogeologists and water resources experts

Focus is water resources development and protection, primarily within the bottled water and other beverage sectors all over the world

Responsible for maintaining the delivery of high quality projects to clients in groundwater resources development
